STATINTL
1. In the absence of [redacted] I called [redacted] Office of Logistics, who replaced [redacted] to make sure that he is aware that S. 917 as reported out of Committee carries a title dealing with the control of firearms. I explained to [redacted] that in the past we have been sending all legislation dealing with firearms to his office for review. I explained that S. 917 did not originally contain a section dealing with firearm control and the title had been added in Committee. [redacted] said he was very interested in following the developments in this legislation.

2. I have forwarded to [redacted] S. 917 as carried in the Congressional Record of 1 May 1968 and have invited his attention to Section 925 which provides a very broad exception for agencies of the United States Government. Amendment No. 708 to Title IV of S. 917 proposed by Senator Hruska was also forwarded. I requested that he advise us if there is any problem with Title IV or the proposed amendment. I said we would send him excerpts from the Congressional Record during the consideration of S. 917 so that he could follow the developments in detail and on a current basis.
